Data Engineer

PROFESSIONAL SUMMARY

Data Engineer with 5+ years building, maintaining, and optimizing enterprise-scale data systems across Oracle, PostgreSQL, SQL Server, MySQL, MariaDB, Azure Data, and MongoDB in cloud and on-prem environments. Proven expertise designing and operating ETL workflows, integrating diverse data sources, optimizing database performance and reliability, enforcing data security and governance, and automating data pipeline and monitoring processes. Experienced with DBA, Azure, AWS, and CI/CD data workflows. Brings a rigorous data quality, compliance, and structured-dataset mindset suited to enterprise analytics platforms.

CORE COMPETENCIES

DBA: PostgreSQL, Oracle, SQL Server, MySQL, MariaDB, MongoDB, SQL/PL/SQL, tuning, execution plan analysis, indexing

Data Engineering: data workflows, Python data processing, data quality & observability automate database operations

Data Pipelines: SSIS ETL design/management; automation; ETL/ELT workflow development; data source integration;

Cloud: Microsoft Azure, Azure SQL, Azure Monitor, Azure DevOps, DMS, AWS RDS, Aurora, EC2, CloudWatch, DMS;

Scripting: Python (data automation, monitoring, alerting, pipeline tooling), Bash/Shell scripting, Cronjob, Ansible, reporting

Data Warehousing & Modelling: Relational data modelling, schema design, normalization, cloud storage solutions; Power BI

Data Security & Governance: RBAC, TDE encryption, compliance/audit reporting, data access controls; data governance

DevOps: Git, Jenkins, CI/CD pipelines; automation and orchestration of database and data workflow processes; Agile/Scrum

Monitoring: Nagios, Azure Monitor; database health, incident triage, root cause analysis; SLA management, data reliability

PROFESSIONAL EXPERIENCE

Data Engineer / Database Administrator | Société Générale March 2023 – Present

- Built and maintained scalable data systems and enterprise databases (Oracle, PostgreSQL, SQL Server, MariaDB) across cloud and on-prem infrastructure supporting critical banking data workloads — 100+ production databases.
- Developed, managed, and optimized ETL/ELT workflows using SSIS for data integration between RDBMS environments; executed data migrations covering data from 10 GB to 2 TB+, improving data integrity by 25%.
- Designed cloud database and storage solutions: migrated Oracle/SQL Server workloads to Azure SQL and PostgreSQL using Azure migration tools and Ora2Pg; administered Azure SQL/AWS RDS/Aurora instances.
- Integrated diverse enterprise data sources across multi-platform environments; supported data pipeline requirements for business reporting and analytics; automated Power BI-style reporting processes (25% reporting effort reduction).
- Optimized database performance and data quality: analyzed execution plans and refined indexing strategies.
- Enforced data security, governance, and compliance: implemented TDE encryption, RBAC user/role/permission administration, and compliance/audit reporting across all environments with sensitive financial data governance.
- Automated processes using Python, Shell and Ansible playbooks into Jenkins and Azure DevOps CI/CD pipelines.
- Designed and implemented backup, recovery, and DR strategies (Oracle RMAN, pg_dump/pg_restore, PITR) ensuring data reliability and continuous availability; monitored database health using Nagios, Azure Monitor, AWR.
- Collaborated with analytics teams to support data integration, schema design, query optimization in Agile delivery.

Data Engineer | Corporate Software Jul 2022 – Dec 2022

- Administered Azure SQL databases; managed CI/CD pipelines (Git, Jenkins, Azure DevOps); built backend RESTful APIs with Java Spring Boot; designed relational schemas for data-driven production applications.

Data Engineer | BC Skills Group July 2021

- Designed database schemas production systems; automated reporting using Power BI with 25% effort reduction.
- Applied Agile/Scrum practices; collaborative delivery using Git and CI/CD pipelines.

KEY PROJECTS

- Architected HA and deployed 2 nodes PostgreSQL cluster with Repmgr replication and PGpool automatic failover.
- DBA Ansible for automating Installation, high availability, backups, monitoring databases on Linux and cloud.

CERTIFICATIONS

- Microsoft Certified: Azure Administrator Associate** - Microsoft, 2024
- Oracle Cloud Infrastructure Data Management Professional** - Oracle, 2024
- AWS Fundamentals** - Amazon Web Services, 2023

EDUCATION

Master Degree - Computer Science | Moroccan School of Engineering Sciences | 2020-2023

Associate Degree - Computer Science | Higher School of Technology, Cady Ayyad University | 2017-2020
